## What Can Your AdView™ Player Do?

Turn virtually any monitor into a digital sign with an AdView™ player. Whether you prefer to use memory cards, a mini hard drive or a fully networked digital sign station, we have a system to fulfill your need. The built in auto-play technology automatically turns your custom content into a digital sign presentation.

### HDP1 Hard Drive Player Features

- USB connectivity for content transfer
- 40 Gbyte of media storage
- Auto start and loop features create dynamic content with JPEG images and MPEG 1, 2 and 4 video
- Audio port supplies stereo sound for external speakers
- Update content through a local network with the HDP1 Network Kit
- Dimensions: 5" x 3" x .75"

HDP1

### Memory Card Player (MP1)

- Multiple memory card player
- Display sharp images and video on most plasma and LCD monitors

MP1 Player
