Specifications

AdViewTM Dynamic Messenger

These self-contained, stand-alone models utilize a variety of memory cards to supply the images for display. Simply record MPEG (1, 2 or 4) or JPEG content to a card and insert into the appropriate slot. It's that easy. No need to learn new software -use current, familiar applications. The AdViewTM Dynamic Messenger automatically turns your photo images into a digital slideshow! No wires, cabling or computer connections required. Each unit has built-in stereo speakers, remote and password protection. 8", 10", 15" and 18" screen sizes are available.

DM8m & DM10m Features

- Has a built-in motion sensor - attracting the attention of passing viewers at the beginning of your message every time
- Built-in stereo speakers deliver high quality audio support for your video message
