

**GRAPHICS PACKAGE**

The Marriott Series, 2000 Graphics Package offered by Graphics Systems, Inc. features attractive ADA compliant signage. Guest room numbers and other permanent room identification are created using our exclusive PHOTQ-ETCH process which produces raised integral tactile images and Grade II braille. Informational and directional signage is 1/8" acrylic with surface screen printed copy and graphics. Paint and ink colors match Sherwin Williams and Benjamin Moore colors. Copy and graphics are SW 1196 Established Green on a field of SW 1128 Urban Putty. Arrows on the directional signage are BM 1267 Burgundy and signage backers are SW 1127 Khaki Shade. This finish coordinates with Marriott's Full Service Guest Room and Corridor Series 2000 Design Package.

**DESIGN & WAYFINDING**

As your site requires, Graphic Systems can design additional signage to complement the Marriott Series 2000 Graphics Package. Custom design and wayfinding services are also available.

Because a signage system is a sizable investment, it is best to have a well thought-out plan for implementation. Therefore, in addition to providing you with an excellent product, Graphics Systems can also provide the necessary services to program a good wayfinding system.

As consultants, we can give you a clear, objective analysis of your facility's "overall" needs from the viewpoint of a visitor. Through a series of interviews and independent studies of the traffic flow patterns, we provide the most comprehensive wayfinding planning available in the industry, complete with message schedules and location plans.

**Installation**

We have installation teams available to integrate and install your new "graphics package" into your specific environment or space.

**OUR COMPANY**

Graphics Systems' unique combination of designers, account executives and skilled fabricators form one of the nation's few "total package" architectural signage companies. We have built our business on the added value of our complete package of services—concept to completion—followed by reliable service.

## INSTALLATION

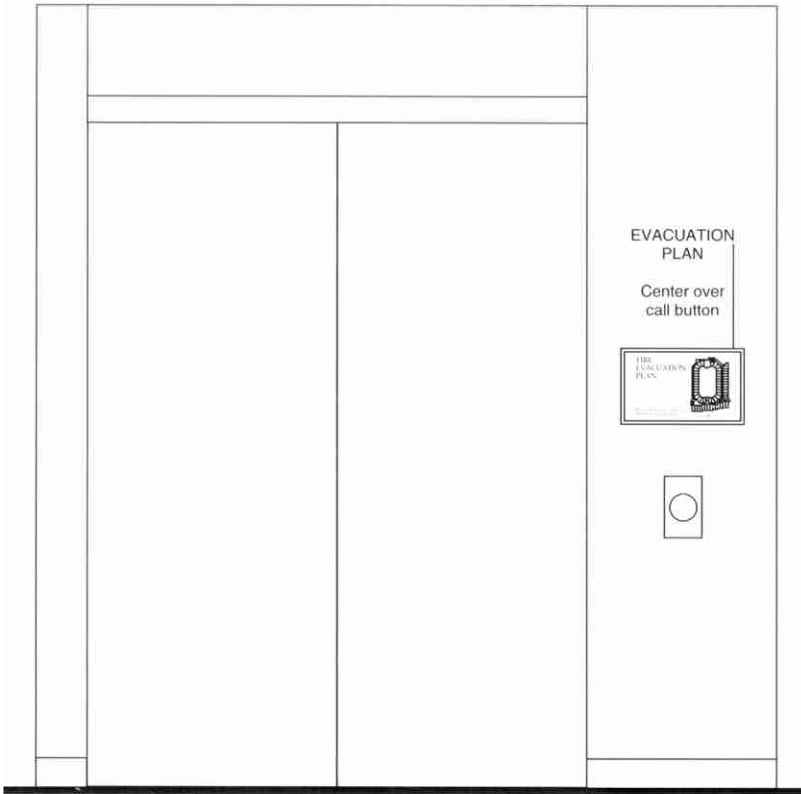

Install signage using silicone adhesive and double sided tape.

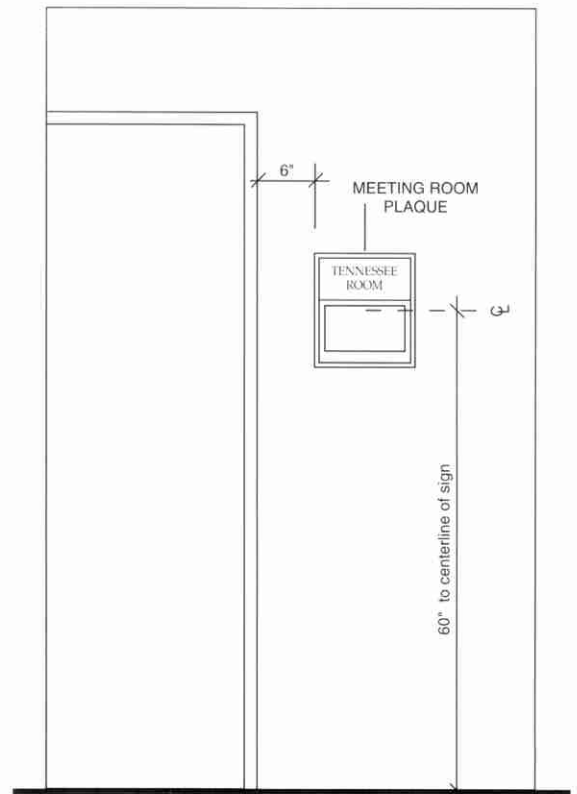

**CORRIDOR SIDE ELEVATION**  
(NOT TO SCALE)

**ROOM SIDE ELEVATION**  
(NOT TO SCALE)

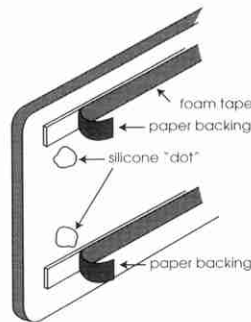

**ELEVATOR EVACUATION ELEVATION**  
(NOT TO SCALE)

**MEETING ROOM ELEVATION**  
(NOT TO SCALE)

### FOAM TAPE AND SILICONE SIGNAGE INSTALLATION INSTRUCTIONS

1. Installation surface must be **CLEAN** and **DUST FREE**.
2. Place a small "dot" of silicone in each corner of the sign. The "dot" should be 1/4" to 3/8" in diameter.
3. Remove paper backing from foam tape.
4. Position sign in desired location and apply enough pressure to ensure the foam tape sticks to the mounting surface. The foam tape will hold the sign in place until the silicone adhesive cures.

5. If removal is required, slide a putty knife gently behind the sign and "cut" through the silicone adhesive and the foam tape.

*If you have questions concerning these instructions or problems with signage installation, call 316-267-4171 for assistance.*
